Subject: ECONOMY

Lecture No.- 33

By- Rishav Sharma Sir

Agriculture (Part 02)

Cobweb Cycle / Phenomenon

Cyclical price fluctuations in Market where production decisions are based on past Market prices. This leads to Overproduction or underproduction which leads to Fluctuations in price.

ZBNF

- Zero Budget Natural Farming
- Subhash Palekar
- Desi Cow Only
- Soil has all the Nutrients which the plants need
- Plants get 98% of the Nutrients from Air, Water and Sunlight
- The remaining 2% can be fulfilled by good quality Soil using Friendly Microorganisms.

4 Components

1. Bijamrita

- Microbial Coating of Seed with Formulation of Cow Dung and Cow Urine

2. Jivamrita

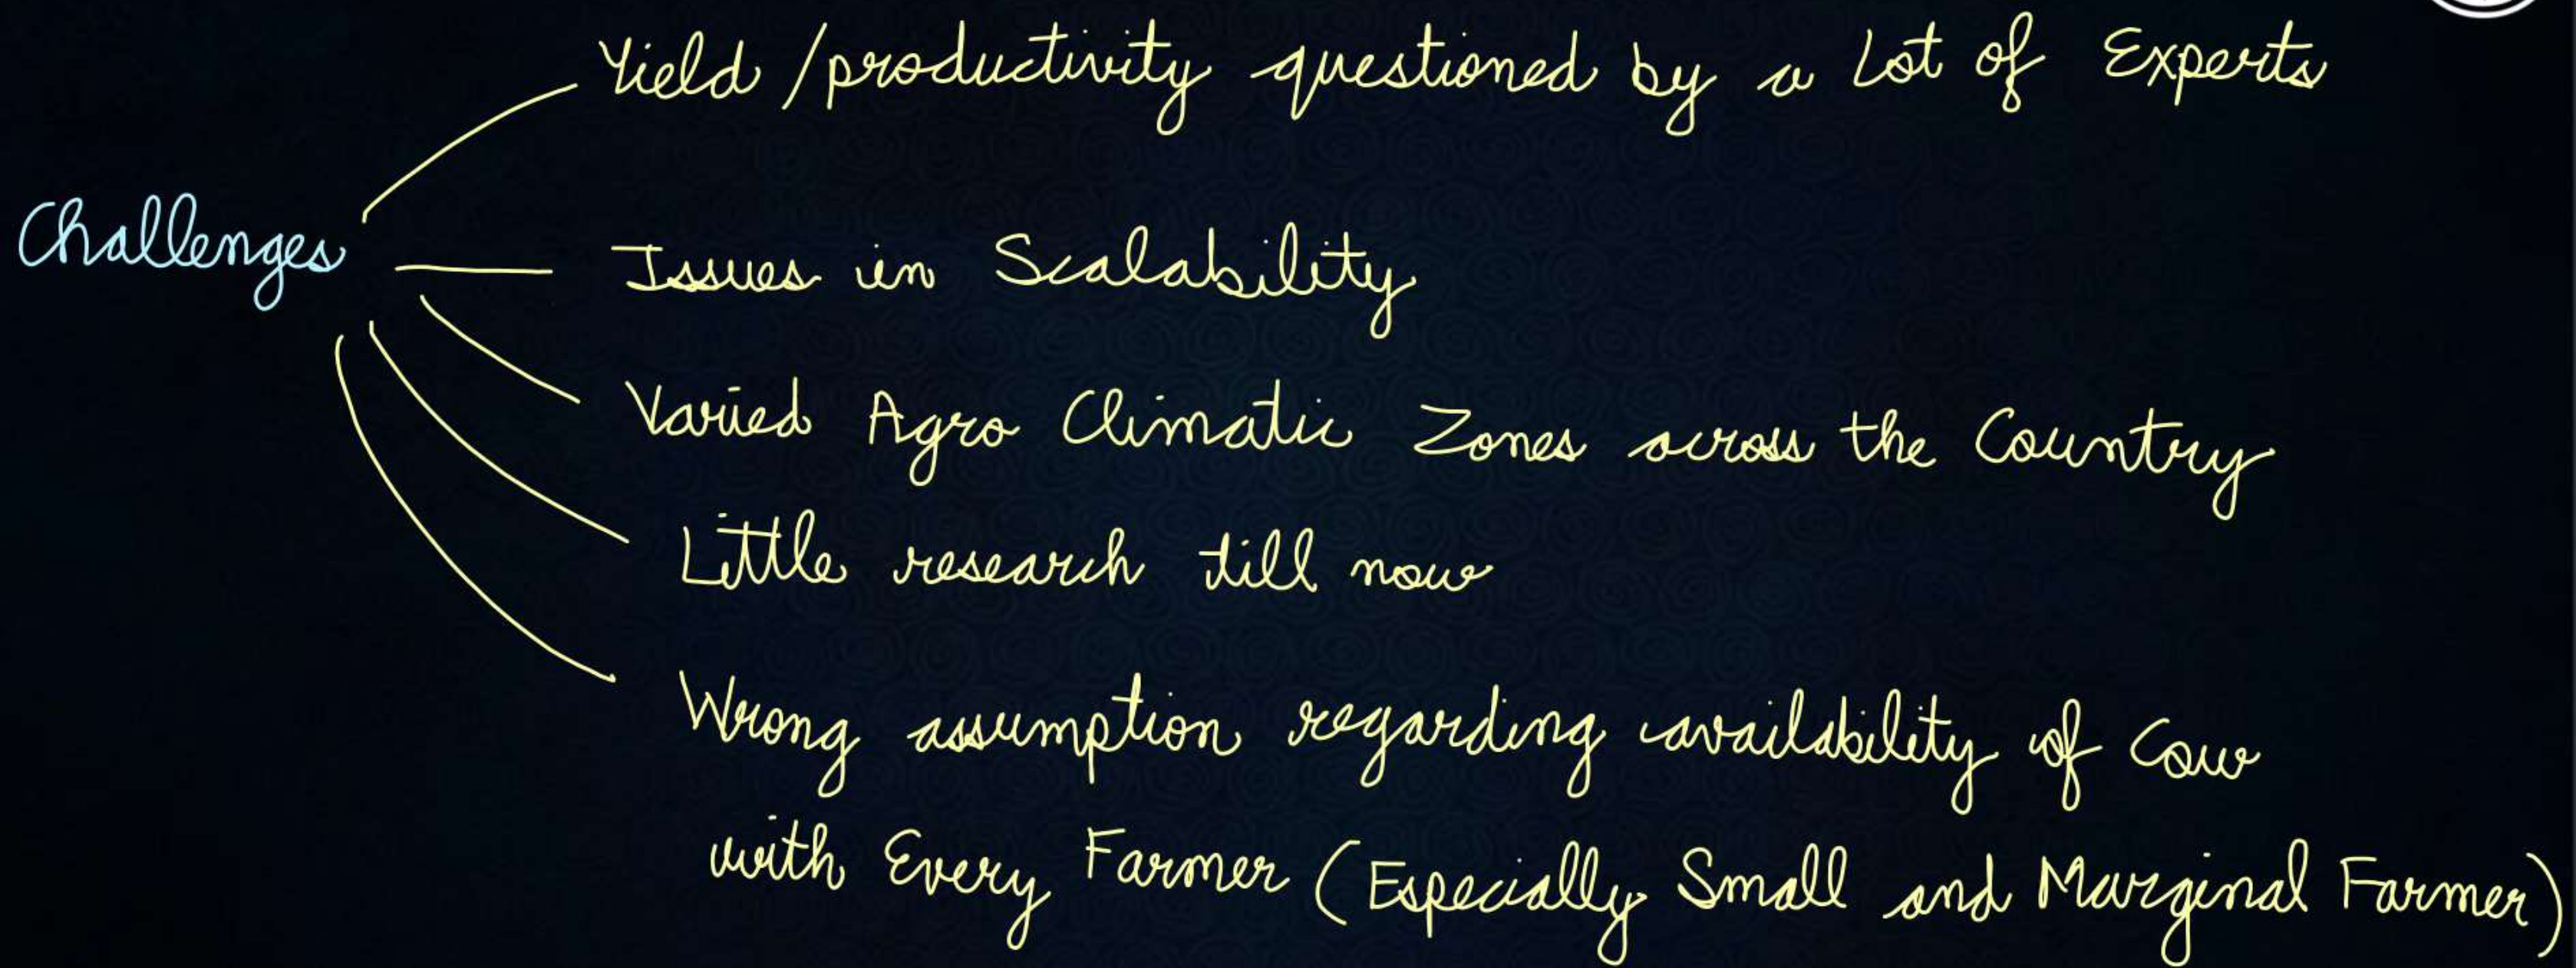

- Enhancement of Soil Microbes using Cow Dung, Cow Urine and Jaggery.

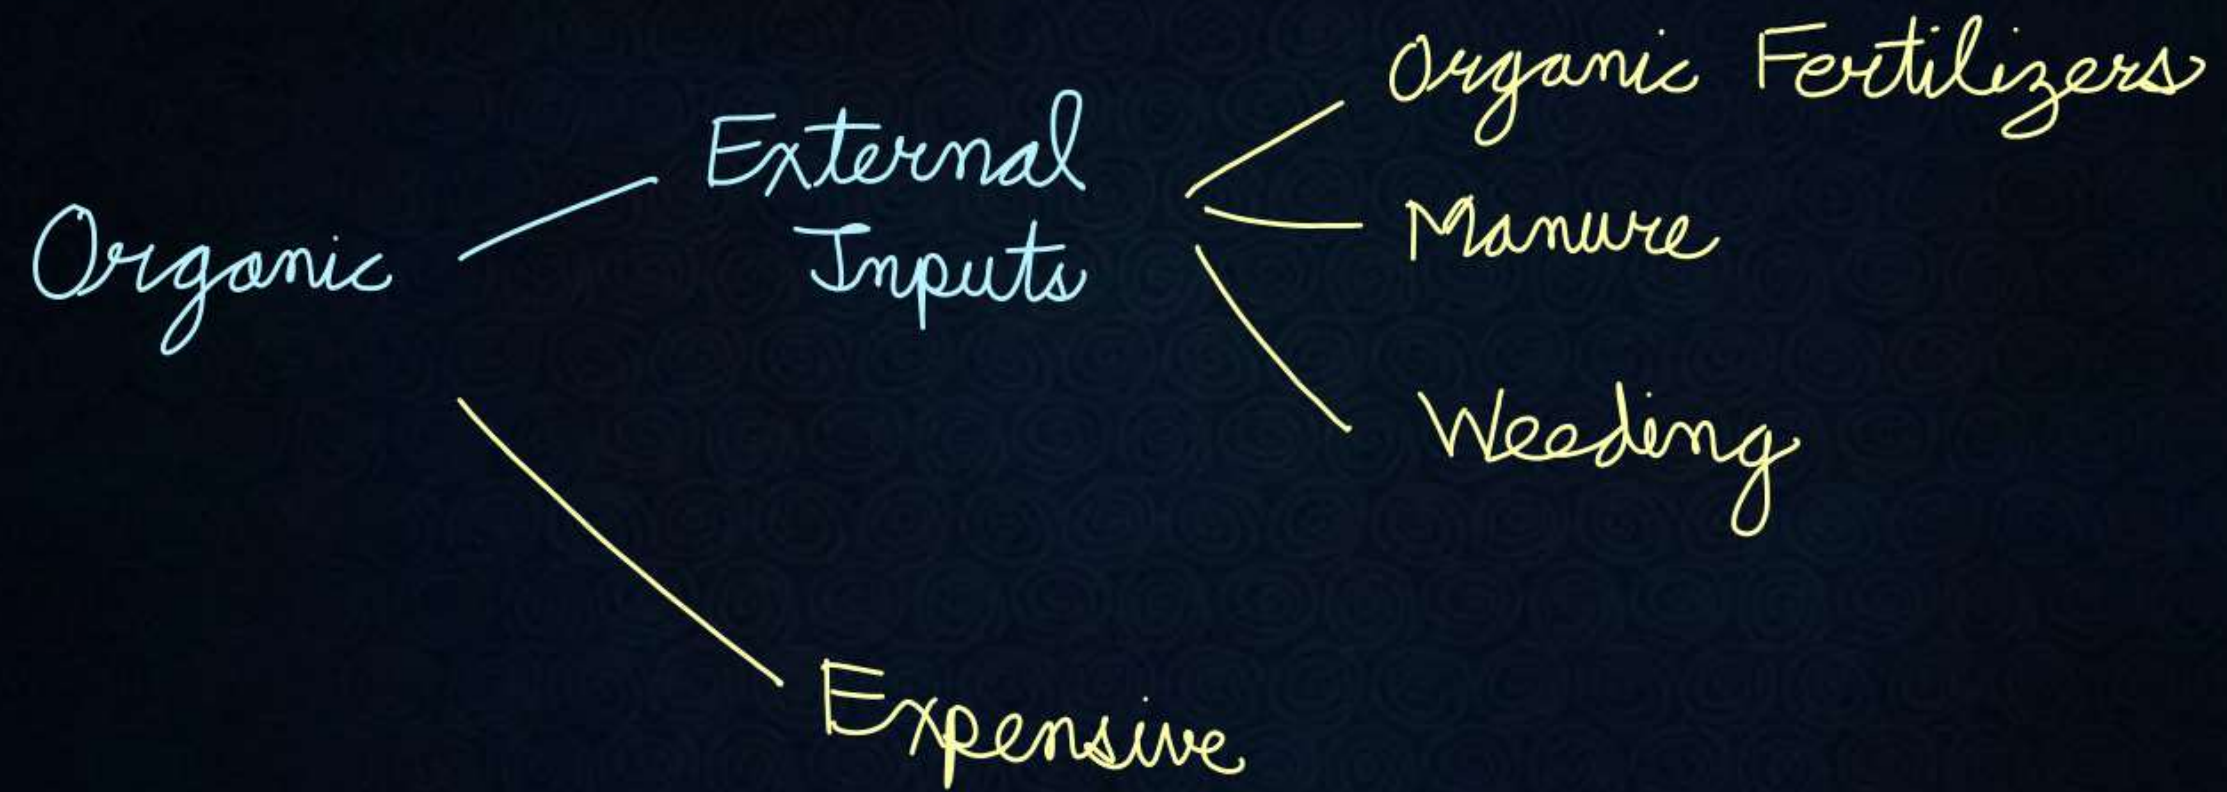

3. Acchadana (Mulching)

- Covering of Soil with plant residue
- Creation of Humus which helps in growth of friendly Microorganism

4. Waaphsa

- Building up of Soil Humus to increase Aeration

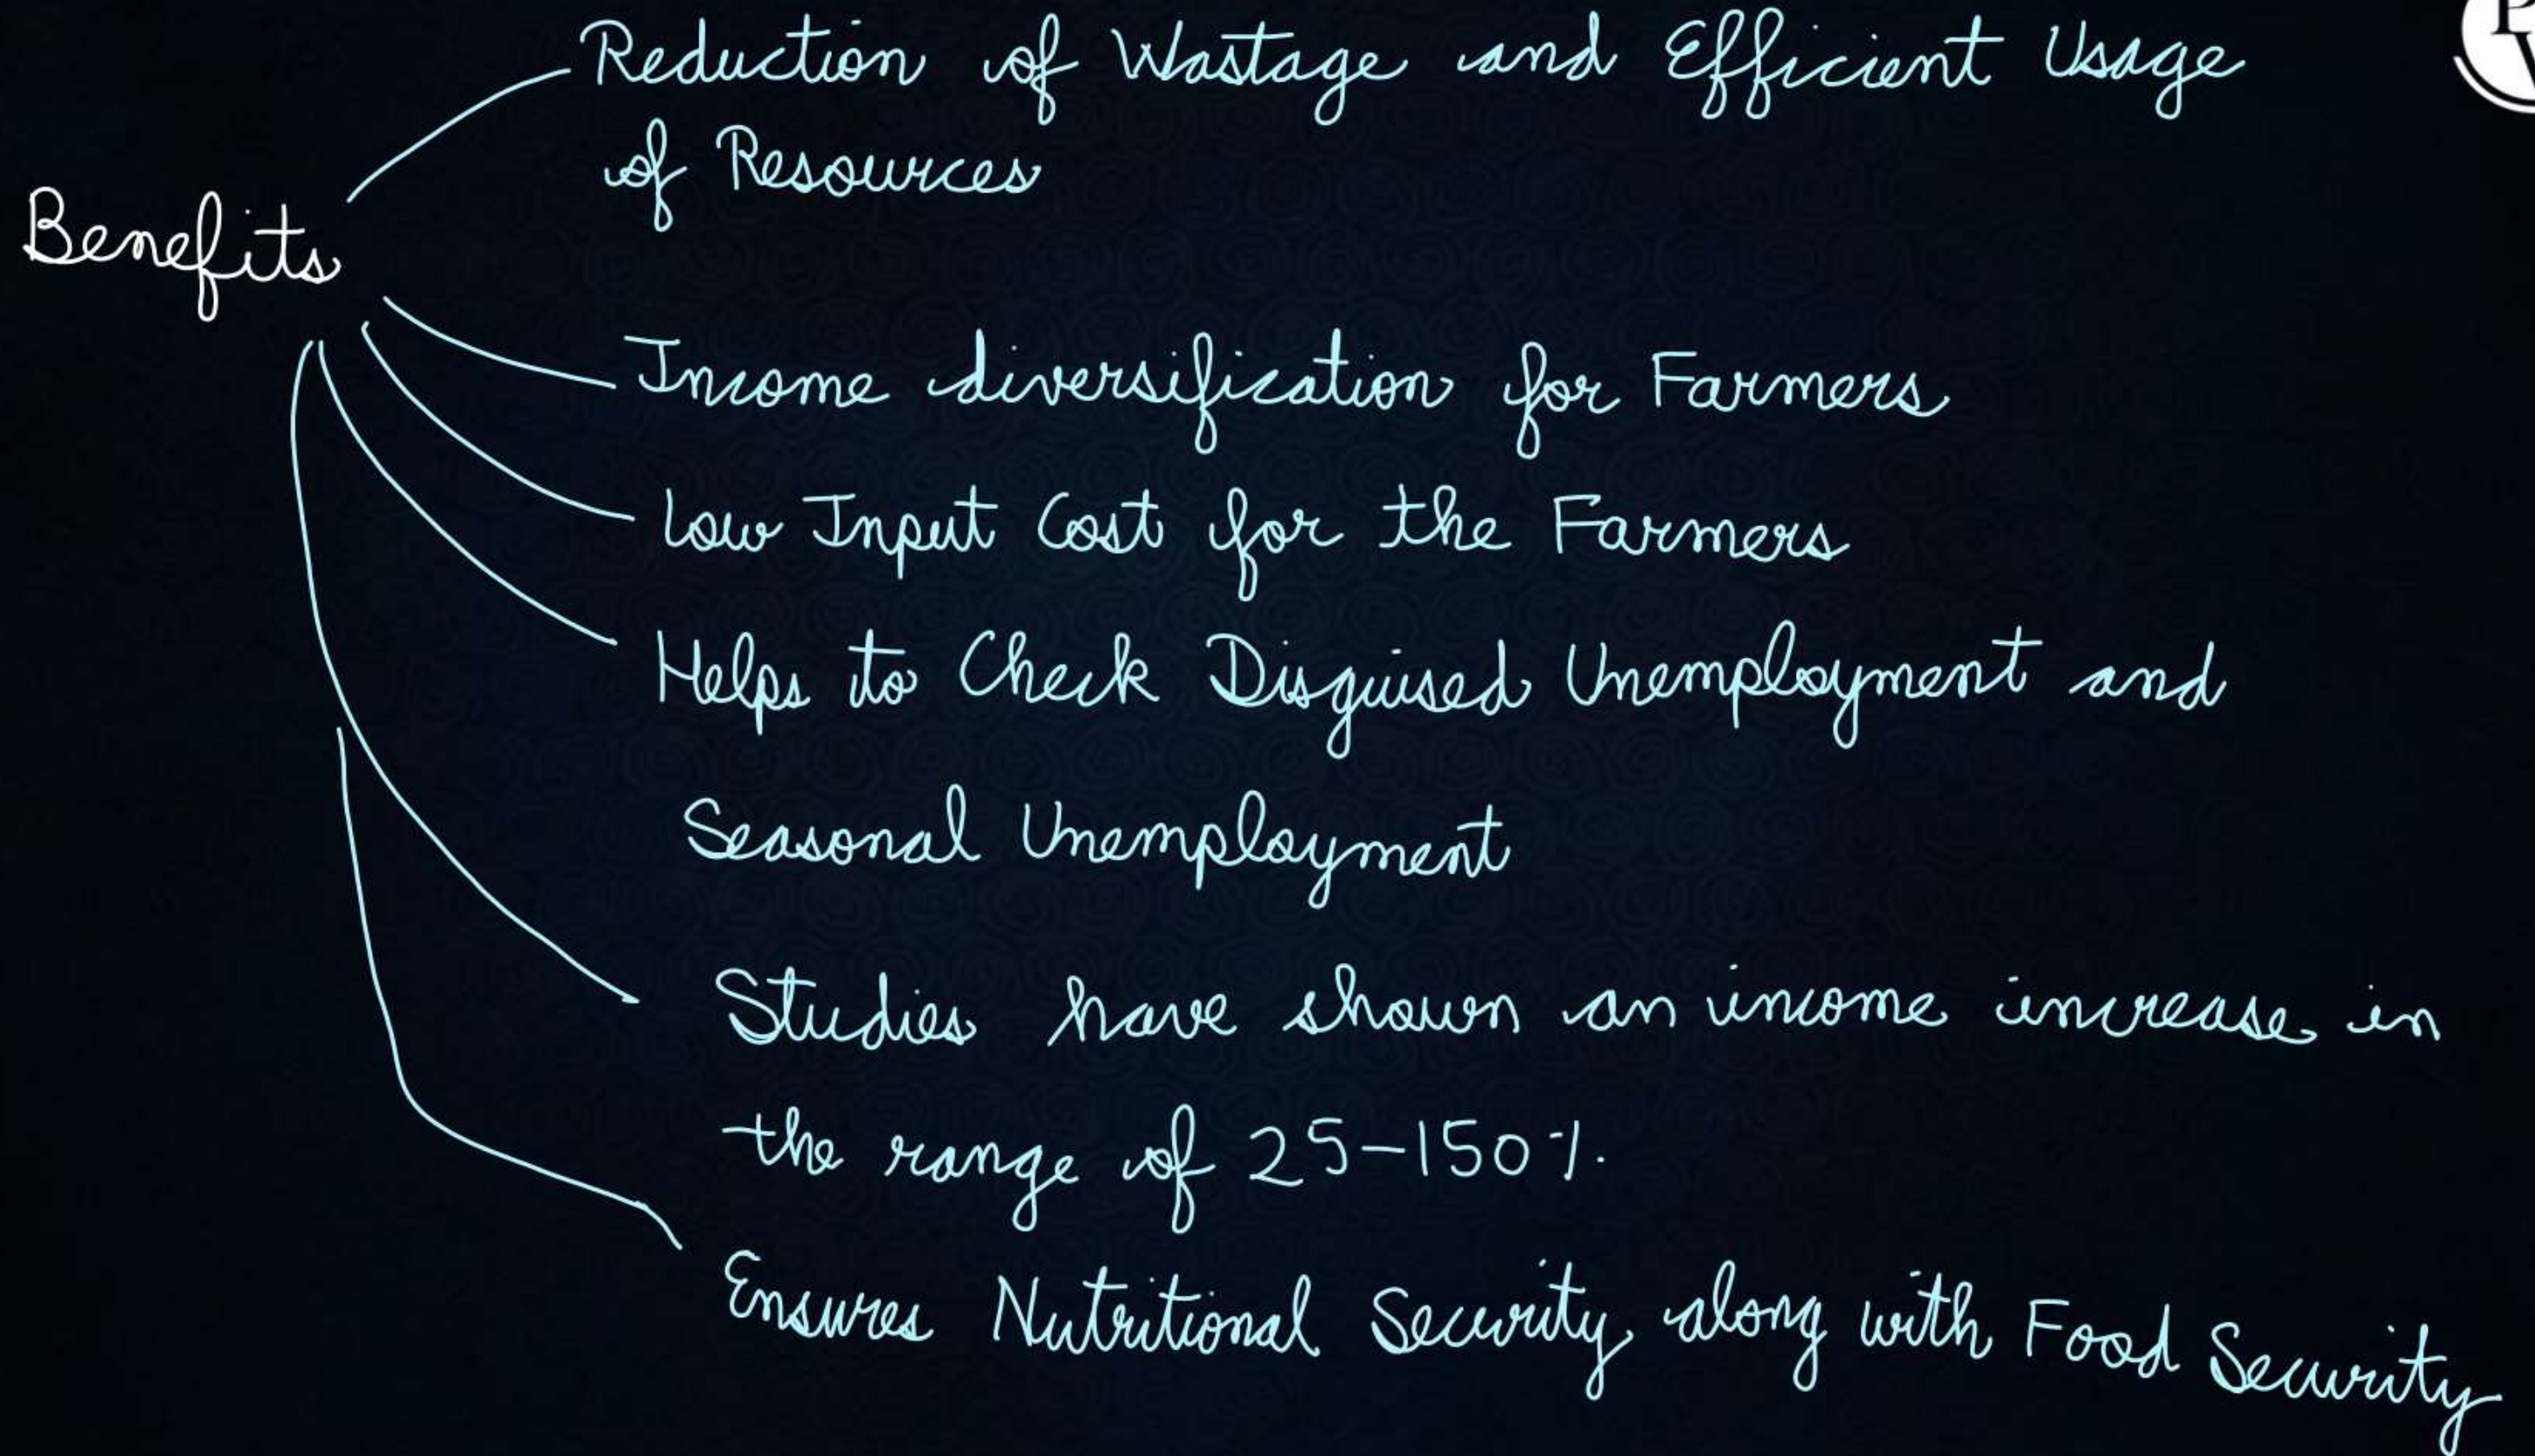

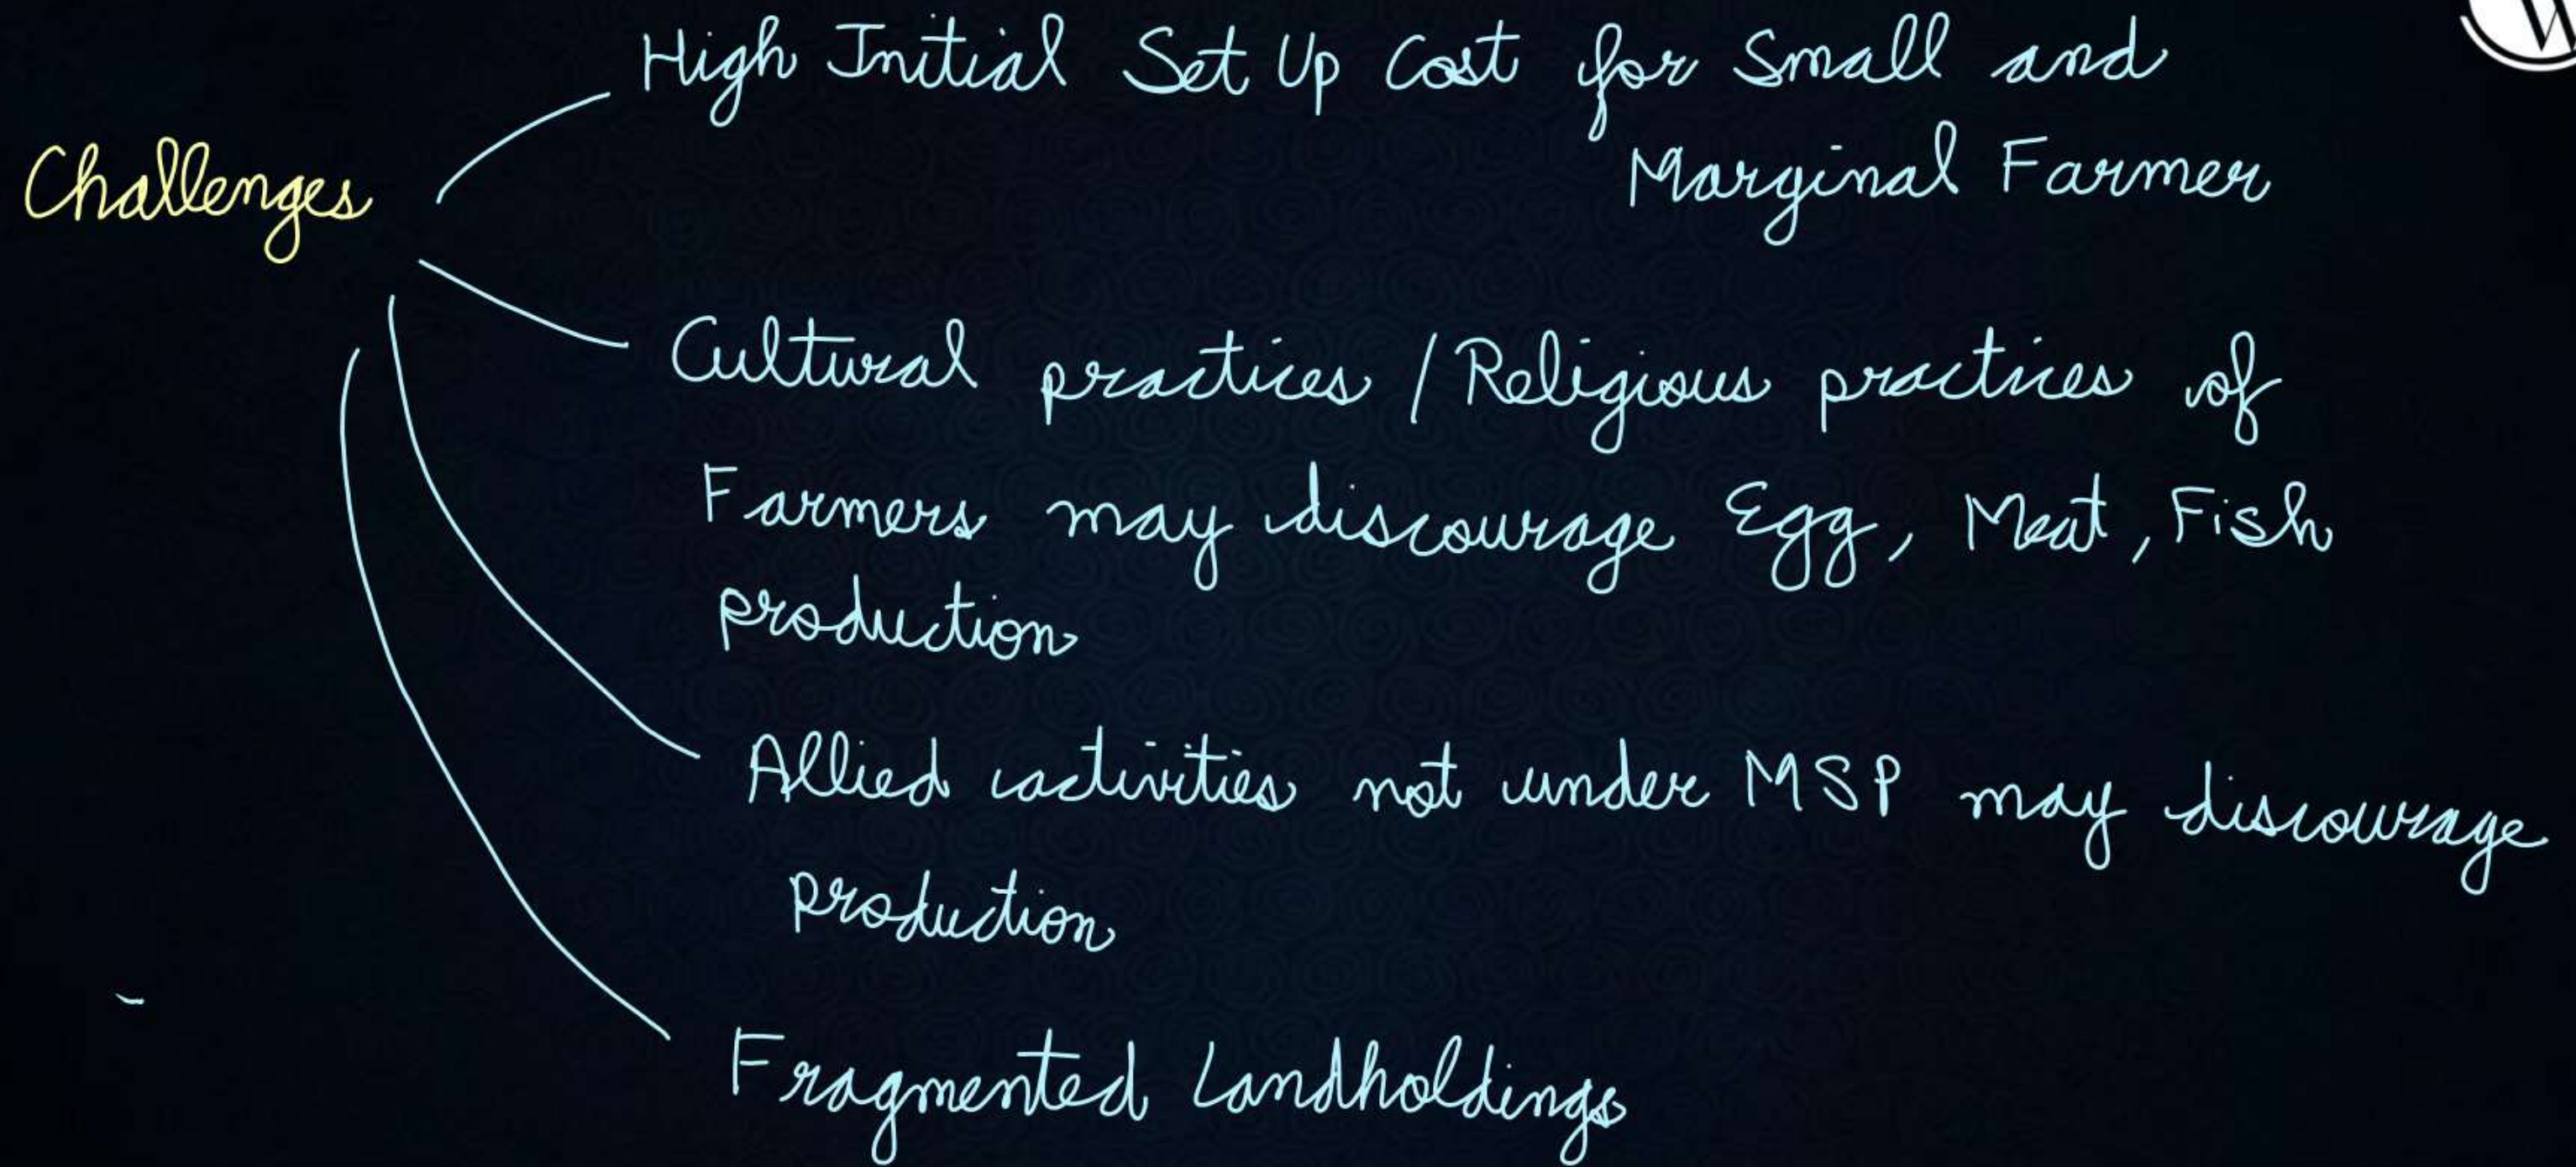

IFS

Integrated Farming System

It is a system which combines different agricultural practices in such a manner that Output of one activity becomes input for the other e.g. Integrated Rice-Fish Farming, Biogas, Usage of Cow dung in Fields etc.

Thank You!
